

DISCOVER THE MEDSYNC ADVANTAGE

MEDSYNC is your medication adherence solution that helps improve your patient's adherence, builds efficiency into your existing pharmacy workflow, and manages potential issues before your patient even comes to pick up their prescriptions.

Most pharmacies without MEDSYNC are responsible for outbound calling, prescription monitoring, and compliance packaging – leaving little time to provide care to patients.

With MEDSYNC, your tasks are automated for you so you have time to focus on pharmacy growth, provide better care to your patients, and reduce workflow errors.

69% OF MEDICATION-RELATED HOSPITALIZATIONS ARE DUE TO NON-ADHERENCE

25% OF PATIENTS ARE NON-ADHERENT BECAUSE THEY FORGET TO TAKE OR REFILL THEIR PRESCRIPTIONS

50% OF CANADIANS ARE NON-ADHERENT TO THEIR CHRONIC MEDICATIONS

MEDSYNC PACKAGING

Compliance packaging within a pharmacy is labour intensive and often the root of high error rates. MEDSYNC handles packaging for you and delivers prescriptions right to your pharmacy.

MEDSYNC strip packaging is a new, more effective package solution that encourages medication adherence and compliance. Your patient's medications come prepared in individual strips that indicate the medication's name (or names), dates, and times to be taken.

Strip packages help your patient take the right medication at the right time.

YOUR MEDICATION ADHERENCE SOLUTION

Coupled with MEDSYNC strip packaging, MEDSYNC helps both you and your patient by:

- Encouraging a proactive refill model that lowers inventory
- Providing more one-on-one time with your patient
- Preventing missed or late refills
- Packaging prescriptions prior to patient pick-up date (sync date)
- Reminding patients when to take their medicine
